

## *MPS 1000-3*

*Riserless Drilling – Pump and Dump – Mix on the Fly*

*The Flow Process Technologies patented Aqua Shear Mixer has been successfully incorporated into the most compact, efficient, reliable system available for “Mix on the Fly” operations.*

*Rapid, efficient mixing of weighted mud with seawater and Ca Cl, to the precise fluid density, assures maximum mud performance, reduced casing sets, and optimized production.*

- *Efficient mixing provided by field proven Aqua Shear Mixer (often copied, never duplicated)*
- *Non-contact magnetic type flow meter means no clogging and greatest reliability*
- *Precise, linear metering and low torque actuation control valves (NOT ball valves)*
- *Compact 3' X 5" footprint (or smaller)*
- *Experienced personnel with global availability*
